

EXHIBIT 5  
DELTA RECREATION MASTER STRATEGY

**Draft Summary of Facilities and Resources by Recreation Zone**

|   | Recreation Zones   |  |  |  |   |  |        |
|---|--|--|--|--|---|--|--------|
|   | North  | Northwest  | Central  | West   | East  | South  | Total  |
| <b>Total Water Surface (acres)</b>          | 3,145  | 7,545  | 5,915  | 29,995   | 7,940   | 5,255  | 59,795 |
| <b>Contiguous Water Surface (acres)</b>     | 2,617  | 7,190  | 5,552  | 29,522   | 7,560   | 5,135  | 57,576 |
| <b>Contiguous Surface Area (sq. miles)</b>  | 4.1  | 11.2   | 8.7  | 46.1   | 11.8  | 8.0  | 89.9   |
| <b>Linear Miles of Contiguous Waterways</b> | 61   | 58   | 132  | 152  | 122   | 110  | 635    |
| <b>Number of Marinas*</b>                   | 8  | 1  | 12   | 56   | 13  | 5  | 95     |
| <b>Boat Slips*</b>                          | 988  | 76   | 1,271  | 5,990  | 2,786   | 563  | 11,674 |
| <b>Water Features</b>                       | Sacramento Gateway Major channels provide water routes to upriver, the City of Sacramento and to other Delta Zones. Limited  | The Yolo Bypass: a flood structure for the Sacramento River, The Cache & Lindsey Slough Complex the shipping canal, shallow non-navigable channels extensive tidal margin lands        | Many navigable channels --some circular routes -- the Delta Cross-Channel  | Gateway to San Pablo and San Francisco Bays, generally large water bodies with many inundated islands  | Numerous main river flows, channels, channel islands, sloughs, city of Stockton   | Sheltered & quiet waters, Clifton Court Forebay, regulated water flows, many vegetation and debris congested channels. The intake area for the California Water System   |        |
| <b>Issues</b>                               | Water safety issues due to the narrow channel configuration of the waterways. Clogged sloughs, Siltation/ dredging, non-operative status of the Sacramento Ship Channel Boat lock, | Siltation/dredging, aquatic weeds, Island inundations at the south end of the Bypass, lack of facilities. Potential for further levee failure due to large bodies of standing water.   | Siltation/dredging, aquatic weeds, operations of Delta Cross Channel, CALFED North Delta Projects, extensive reduced speed zones,                                      | Urban encroachment Aquatic weeds, submerged obstacles Siltation/dredging, user group conflicts, deferred maintenance for many of the boating facilities, | Siltation/dredging, submerged obstacles, lack of buoy areas, merchant boating traffic along San Joaquin   | Primary CALFED improvement area with potential diversions and channel barriers proposed. Urban encroachment occurring in the Lathrop, Tracey & Mountain House areas, Siltation/ dredging, submerged obstacles and clogged and impassable waterways |        |
| <b>Opportunities</b>                        | Subarea includes many historic features, the City of Sacramento and West Sacramento JPA for Riverfront area, potential tourist destination points                                  | Extensive public land ownership. High habitat & wildlife values numerous waterways and channels accessible to small non-motorized water craft.   | Multiple routes and water channels including the Mokelumne, Cosumnes, and Sa Joaquin Rivers, extensive naturalized channels with the Developed CDPR Delta Meadows area | Largest percentage and extent of navigable waters, numerous boating facilities, highly functional boat launching facility at Brannan Island              | Stockton Gateway area with water oriented development at the Port of Stockton. Numerous unique settings with din river islands. Deep water access along the San Joaquin River | Extensive naturalized channels along Old River and adjoining sloughs, Many areas sheltered from wind by Diablo Range, Warmest temperatures and calmest water conditions, ideal water-ski, wake boarding areas                                      |        |
| <b>Types of Recreation</b>                  | Cruising, fishing, and channel exploring, riverboat tours  | Mostly land-based hunting and wildlife viewing   | Cruising, fishing, water-skiing, camping, sailing  | Wind-surfing, sailing, fishing, large boat cruising  | Fishing, sailing, cruising  | Some cruising, water-skiing, wake-boarding, primary fishing area   |        |
| <b>Unique Characteristics</b>               | Linear water channels and routes, extensive urban interface, Raley Field Discovery Park, Old Sacramento, Stone Lakes Wildlife Preserve, naturalized levees                         | Extensive natural and restored habitat areas unique upper tidal zone vegetation and habitat areas. One of the few areas in the Delta with levee-less channels. Jepson Prairie Preserve | Cosumnes River Preserve, Delta Meadows, Locke Historic town, the Cross Channel   | High constant winds through the Carquinez Brannan Island State Park, Bethel Island, Big Break Interpretive area  | Mildred Island, several yacht clubs, Port of Stockton, river islands, deep channels   | Discovery Bay, Clifton Court Forebay, Major intakes for water transfers.   |        |
